

BlackBridge
JOB VACANCY

Front-End Developer (f/m)

Company: **BlackBridge AG**
Department: Platform Development
Location: **Berlin**

This is an open-ended position, full-time, 40 hours a week.

Background:

BlackBridge provides end-to-end solutions across the geospatial value chain. By combining satellite operations, data center and geocloud solutions, and the world's largest commercial imagery archive, with global distribution through a network of over one hundred expert partners, BlackBridge truly delivers the world.

The Must Haves:

- Excellent HTML, CSS and JavaScript skills
- Proficient testing skills
- Experience with ReactJS and/or AngularJS
- Thorough knowledge of build systems like Grunt or Gulp
- Willingness to work in a mixed Frontend / Backend team
- Understanding of REST APIs

The Nice to Haves:

- Experience with geospatial concepts
- Knowledge of geospatial frontend libs like OpenLayers, Leaflet or Turf
- Solid experience with transpilers like browserify, sass, less or PostCSS
- Expertise in Linux based environments
- Experience with Agile Software Development methods
- Any backend development experience is welcome
- Expert level full-stack web development experience
- CI/CD knowledge is a plus

BlackBridge
